ABSTRACT

This study aims to analyze the various factors influencing ''An Empirical study on Employee Job Satisfaction with Special Reference to sri Lakshmi Homes Privater Limited, Chennai.'' The research is conducted using primary data collected from 100 respondents through a structured questionnaire.

Descriptive research design was adopted for the study. Statistical tools such as Percentage Analysis, Correlation, and Chi-Square Test were used to analyze the collected data. The findings of the study reveal that majority of the respondents have clear preferences and opinions regarding the selected topic. The study concludes that there exists a significant relationship between the key variables considered in the research. The results provide useful insights for improving strategies and decision-making in the concerned field.
